Economic Indicators of the Farm Sector: State Financial Summary, 1988. Agriculture and Rural Economy Division, Economic Research Service, U.S. Department of Agriculture. ECIFS 8-2.

Abstract

California led in net farm income for 1988 with $6.1 billion. Texas was second with $3.7 billion, followed by Florida ($2.9 billion), Nebraska ($2.1 billion), and Iowa ($2.0 billion). Net farm income reflects cash income minus cash expenses plus adjustments for noncash and operator dwelling income and expenses. Cattle and calves and dairy products were the top commodities in cash receipts. Texas led cattle and calf receipts with $4.9 billion, and Wisconsin topped dairy sales with $3.0 billion. Soybeans and hogs were the third- and fifth-ranked commodities, and Iowa led in sales for both, with receipts of $1.2 billion and $0.9 billion, respectively. Corn was the fourth-ranked commodity, and Illinois was the leader with receipts of $1.8 billion.

Keywords: Net farm income, returns to operators, farm assets, and farm debt.

Washington, DC 20005-4788 October 1989

Preface

This report is one of six segments in the *Economic Indicators of the Farm Sector* series. Other reports are *National Financial Summary, Production and Efficiency Statistics, Farm Sector Review, Costs of Production--Crops,* and *Costs of Production--Livestock.*

State Financial Summary, 1988 corresponds to the national farm income and balance sheet accounts published in *National Financial Summary, 1988* disaggregated to State levels. One major feature of these reports is the separation of the operator's farm dwelling and household from farm production transactions, assets, and debt. All of the income estimates in these reports are based on the calendar year.

The data are based on information mainly from the U.S. Department of Agriculture's National Agricultural Statistics Service and the Census of Agriculture. Additional information is from other Government agencies and, in some cases, from private sources. Revisions were made for 1985-87. State-level farm income estimates for 1988 are published for the first time.

This publication was prepared by the staff of the Farm Income Estimation Section and the Farm Financial Analysis Section, Farm Sector Financial Analysis Branch, Agriculture and Rural Economy Division, Economic Research Service.

Principal contributors and information sources:

Highlights

The 1988 drought and its early prediction greatly influenced prices in U.S. agriculture. Crop prices rose substantially early in the year and continued rising through the third quarter, causing farmers to reclaim large quantities of commodities placed under CCC loan programs. Farmers then sold the reclaimed commodities at a considerable profit. The drought's effects were felt principally in the Midwest where yields were reduced. Farmers in areas that had little or no loss of production benefited from the higher crop prices. Livestock producers paid considerably more for feed due to higher prices for feed crops. Net farm income fell 3.1 percent in 1988 to $45.7 billion as the reduction in crop inventories partially offset the rise in crop cash receipts, and expenditures for feed rose.

Here's a 1988 financial profile of some major farm States:

California led all States in total cash receipts from farm marketings with $16.6 billion, followed by Texas, $10.3 billion; Iowa, $9.1 billion; Nebraska, $8.0 billion; and Kansas, $6.6 billion. Texas, Nebraska, Iowa, California, and Wisconsin led in livestock receipts while California, Florida, Illinois, Iowa, and Texas led in crop receipts.

Top earners of cash receipts for specific commodities were Texas for cattle and calves, Wisconsin for dairy products, Iowa for soybeans and hogs, Illinois for corn, Arkansas for broilers and rice, California for greenhouse and nursery products, eggs, hay, tomatoes, grapes, and lettuce, Kansas for wheat and sorghum, and North Carolina for tobacco and turkeys.

California also led all States with the most net cash income from farming ($6.5 billion). Texas earned $3.9 billion, followed by Iowa, $3.4 billion; Florida, $3.1 billion; and Minnesota, $2.7 billion.

The ranking of the top five States for net farm income changed from 1987 but the composition remained the same, and, with the exception of Iowa, the incomes (1987 shown in parentheses) changed little. California led with $6.1 billion ($6.1 billion); Texas, $3.7 billion ($3.8 billion); Florida, $2.9 billion ($2.5 billion); Nebraska, $2.1 billion ($2.1 billion); and Iowa, $2.0 billion ($2.7 billion).

Both net farm income and net cash income reflect cash income less cash expenses. Net farm income also includes noncash income and expense items on an accrual basis, plus expenses and income associated with the onfarm residences. Net cash income simply reflects the difference in cash income and cash expenses associated with the farm business.

Balance sheet accounts showed that the leading States in assets (excluding operator households), as of December 31, 1988, were: Texas, at $71.9 billion; California, $51.8 billion; Iowa, $46.9 billion; Illinois, $43.5 billion; and Minnesota, $27.8 billion. California farmers owed the most total debt, $12.3 billion, followed by Texas, $10.1 billion; Iowa, $9.4 billion; Illinois, $7.3 billion; and Minnesota, $6.7 billion. Texas registered the largest equity, $61.8 billion, followed by California, $39.5 billion; Iowa, $37.5 billion; Illinois, $36.3 billion; and Nebraska, $22.6 billion.

States with the highest debt/asset ratios, excluding operator households, were Wisconsin with 25.5 percent; Louisiana, 24.6 percent; Mississippi, 24.3 percent; Minnesota, 24.0 percent; and California, 23.7 percent. We derive the debt/asset ratio by dividing liabilities by assets.

Economic Indicators of the Farm Sector
State Financial Summary, 1988

1988 Agriculture Wrap-up

Net farm income fell 3.1 percent to $45.7 billion in 1988 while net cash income rose 3.8 percent to $59.9 billion. Direct Government payments to farmers were 13.5 percent lower than in 1987 and constituted a smaller share of gross farm income: 8.2 percent in 1988 versus 9.8 percent in 1987. Forecasts of a severe drought made early in the year resulted in a substantial rise in prices for feed and food grains and oil crops. These prices rose until harvest and then remained at high levels throughout the marketing year. Farmers increased earnings throughout the second and third quarters in 1988 by reclaiming large quantities of commodities previously placed under CCC loans and selling them on the open market. This opportunity arose because market prices exceeded the loan rates on the existing contracts. Crop receipts rose by 13.8 percent due to a combination of higher market prices, a selloff of farmer-owned crop inventories, and profits from the resale of commodities previously placed under CCC loan.

The selloff of the cattle herd, in process for several years, abated somewhat in 1988. Therefore, the number of cattle and calves in inventory fell less than in previous years causing the value of inventory change for livestock and poultry to remain negative but to increase nominally from the prior year. Gross farm income increased because a smaller inventory adjustment was subtracted from cash receipts.

The farm sector balance sheet excluding operator households continued to improve, as farm equity increased for the second year in a row. The value of farm assets rose for the second consecutive year, increasing by $42.2 billion to $748.5 billion, and debt declined $5.2 billion in a continuation of a 5-year trend. The 5.5-percent rise in farm asset values and the decline in farm debt boosted the equity in farm assets by 8.2 percent to $610.0 billion at the end of 1988. The total real rate of return on equity, at 8.0 percent, was positive for the second time since 1980.

State Income Accounts

State financial data appear in two major sections: income accounts and balance sheets. Throughout the publication, table titles indicate whether farm operator household transactions are included or excluded. Net farm income is the only income account that is computed including households. The other five income accounts—net cash income, net business income, net cash-flow, cash income of farm operator households, and returns to operators—exclude household transactions. The returns-to-operators measure is net farm income with household transactions excluded.

Rankings by Commodity and State

California led the Nation with $16.6 billion in cash receipts from all commodities in 1988. Because of the diversity of its agriculture, California's four top commodities in sales—dairy products, cattle, greenhouse/nursery, and grapes—accounted for just 39 percent of the State's total cash receipts. California led in crop sales and was the top producer of greenhouse and nursery products, eggs, hay, tomatoes, grapes, and lettuce. The State ranked fourth in total livestock earnings. Texas ranked second in cash receipts, with $10.3 billion in sales, was first in all livestock, and fifth in all crops. Texas was the leading producer of cattle and calves and cotton and was second in sales of grain sorghum. Iowa ranked third in cash receipts, with $9.1 billion, and had the third highest sales of livestock and the fourth highest crop sales. Nebraska ranked fourth, with $8.0 billion in sales of all commodities, while Kansas ranked fifth, with $6.6 billion in sales.

In 1987, California, Texas, Iowa, Nebraska, and Illinois had ranked as the top States in cash receipts for all commodities. Texas led in livestock receipts, and California earned the highest crop receipts.

Net Farm Income

The five leading States in net farm income were California ($6.1 billion), Texas ($3.7 billion),

Florida ($2.9 billion), Nebraska ($2.1 billion), and Iowa ($2.0 billion).

Net farm income is a measure of the net value of production in a given year, reflecting cash and noncash components in both income and expenses. Noncash income includes home consumption of commodities produced on the farm, imputed rental value of all dwellings, and the value of the net change in inventories. Noncash expenses include depreciation of buildings and equipment and perquisites to hired labor. To eliminate the effects of production from prior years, ERS values and adds unsold and unused portions of new production, and deducts sales from beginning-year inventories. Inventories of crops typically rise during years of heavy production because of depressed prices and decline when production is below normal as farmers take advantage of higher prices.

The net farm income account differs from the other five accounts by the inclusion of income and expenses related to the farm operator's dwelling, in addition to those associated with farm laborers' dwellings. ERS treats the imputed rental value of the operator's dwelling as income and includes expenses associated with the operator's dwelling: repair and maintenance, interest, taxes, capital consumption, and miscellaneous costs, such as insurance. Dwelling expenses tend to increase when the farm is closer to a city. Residential real estate values are usually higher and farms are usually smaller in more urbanized areas. Thus, the ratio of the value of the residences to the value of farmland is usually higher in more urbanized States.

Net Cash Income

Net cash income from farming rose to $59.9 billion from $57.6 billion. Net cash income from farming was highest in California, at $6.5 billion, followed by Texas, $3.9 billion; Iowa, $3.4 billion; Florida, $3.1 billion; and Minnesota, $2.7 billion. In 1987, the top earners were California, Iowa, Texas, Florida, and Minnesota.

Net cash income is a function of all cash transactions and is calculated as gross cash income, such as cash receipts and direct Government payments, minus cash expenses, such as seed, feed, fertilizer, property taxes, and interest. Net cash income from farming is an indicator of funds generated by the business for capital asset purchases, loan retirement, and operator household cash income. Both net farm income and net cash income reflect cash income less cash expenses, but net farm income, in addition, includes noncash income and expense items on an accrual basis. It also includes expenses and income associated with the onfarm residences. Net cash income simply reflects the difference in cash income and cash expenses associated with the farm business.

Net Business Income

Net business income was $45.4 billion, up from $43.2 billion in 1987. California led all States with $5.9 billion, followed by Texas, $3.2 billion; Florida, $2.7 billion; Iowa, $2.4 billion; and Minnesota, $2.0 billion. In 1987, the State rankings were California, Iowa, Texas, Florida, and Nebraska.

Net business income measures earnings by farmers. It is net cash income minus capital consumption, which is the sum of depreciation and accidental damage to farm equipment and buildings. This measure corresponds more closely to accounting methods used by most farmers to compute their taxable incomes. Under the Internal Revenue Service's cash accounting method, profit is computed as payments received minus the sum of depreciation and payments made. Changes in net business income approximated changes in net cash income during 1981-84 because capital consumption was stable. However, in 1987, net business income from farming increased 20.2 percent compared with an 11.4-percent increase in net cash income, because capital consumption fell by 8.8 percent. In 1988, capital consumption increased only slightly and the two income measures experienced similar increases.

Farm Production Transactions

Average U.S. returns to operators dipped by $1.7 billion to $41.2 billion. California led the Nation in returns to operators, at $5.9 billion, followed by Texas, $3.3 billion; Florida, $2.8 billion; Nebraska, $2.0 billion; and Iowa, $1.9 billion. The 1987 totals were: California, $5.8 billion; Texas $3.4 billion; Iowa, $2.6 billion; Florida, $2.4 billion; and Nebraska, $2.0 billion.

Returns to operators are computed as gross receipts less both nonfactor and factor payments. This measure of returns differs from net farm income in the exclusion of the imputed rent and expenses associated with operator dwellings. The principal component of nonfactor payments is intermediate product expenses, which include farm-origin inputs such as feed, seed, and purchases of livestock and poultry, and nonfarm-origin inputs such as fertilizer, fuel, repairs, storage, and transportation. The other components of nonfactor payments are capital consumption and property taxes. Capital consumption captures expenses like wear, tear, and obsolescence associated with the use of durable goods and indicates the amount that must be spent on capital items so that the ending stock is capable of providing the same services as the beginning stock. Therefore, capital consumption is valued at replacement cost rather than the original purchase price. Nonfactor payments rose to $93.3 billion from $86.5 billion.

Factor payments are the income returns to the factors of production: land, labor, and capital. These returns are interest, wages to hired labor, net rent to nonoperator landlords, and returns to operators. The returns-to-operators component is the portion of income left to operators as the returns for their own labor, management, and capital used in farming. Factor payments decreased to $74.9 billion from $76.1 billion.

Production Expenses

Total production expenses including households rose to $132.0 billion from 1987's $124.5 billion. The leading States in production expenses were California, $11.7 billion; Texas, $9.3 billion; Iowa, $8.8 billion; Nebraska, $7.7 billion; and Illinois, $6.4 billion. The composition of the group was unchanged from 1987, but the ranking changed.

Production expenses in all accounts except for net farm income exclude expenses associated with operators' dwellings. In all of the income accounts, net rent to operator landlords is not an expense because it is an exchange of funds between farmers and does not generate a net income effect within the sector. Net rent to nonoperator landlords is an expense, because it represents payment by farmers for the use of land and buildings to nonfarmers.

State Balance Sheet Accounts

The farm sector balance sheet estimates the current market value of assets, debts (liabilities), and net worth or wealth (assets minus liabilities). The farm sector may be viewed either as a business (excluding personal assets and liabilities of farm households) or as a firm/household (including both farming and personal activities of farm households), so ERS estimates two balance sheets. Both balance sheet accounts include the landlords' and the farm operators' farm business assets and debt. The account that includes operator households contains part of the farm families' personal assets, such as the value of the operator dwelling if located on the farm, the value of farmers' household equipment and furnishings, the portion of automobiles and trucks used for nonfarm purposes, time deposits, savings bonds, and the related debt on these items.

Assets, Debt, and Equity

Total farm assets (excluding operator households) rose to $748.5 billion on December 31, 1988, up 6.0 percent from the previous year. Fluctuating real estate values strongly affected total farm assets because real estate assets were 72.9 percent of total farm asset values in 1988.

The States with the highest farm asset values (excluding operator households) were Texas, at $71.9 billion; California, $51.8 billion; Iowa, $46.9 billion; Illinois, $43.5 billion; and Minnesota, $27.8 billion.

Total U.S. farm debt (excluding operator households) was $138.4 billion, a 3.3-percent drop from a year before. Real estate debt fell 5.4 percent, and nonreal estate debt fell 0.4 percent. California was the leading State in total liabilities (excluding operator households), at $12.3 billion, down from $12.5 billion. Texas was second in total liabilities, at $10.1 billion, down from $10.8 billion. Iowa ranked third, at $9.4 billion, down from $9.7 billion; Illinois ranked fourth with $7.3 billion, down from $7.4 billion; and Minnesota ranked fifth with $6.7 billion, down from $7.0 billion.

Equity (excluding operator households) rose $46.8 billion from December 31, 1987 to December 31, 1988, to a level of $610.0 billion. Texas registered the largest equity, at $61.8 billion, followed by California, $39.5 billion; Iowa, $37.5 billion; Illinois, $36.3 billion; Nebraska, $22.6 billion; and Kansas, $21.3 billion. Nebraska realized the greatest increase in equity, 20.9 percent. Iowa showed a 20.5-percent rise, and Pennsylvania's farm equity rose 16.1 percent.

Debt/Asset Ratio

The debt/asset ratio provides insight into the collateral security of loans (a security pledged against the performance of a contract), the relative indebtedness of the farm business, and the risk borne by lenders.

The farm sector debt/asset ratio (excluding operator households) had fallen to 18.5 percent from 20.3 percent by the end of 1988. Wisconsin had the highest 1988 debt/asset ratio of all States, at 25.5 percent, followed by Louisiana, 24.6 percent; Mississippi, 24.3 percent; Minnesota, 24.0 percent; and California 23.7 percent.

Table 1--Summary of the farm sector's financial status, by State, 1988

See footnotes on next page.

Footnotes for Table 4

1/ Includes operator dwellings.

2/ Includes forest product sales, recreational income, and other farm business-related income. Estimates for 1982 and later include income from custom feeding services.

3/ Includes machine hire and customwork expenses; marketing, storage, and transportation expenses; and miscellaneous expenses. Definition and data sources for 1978 and later are not directly compatible with those of earlier years.

4/ Includes contract labor expenses, hired labor wages, and Social Security payments.

5/ Uses different data sources among the period before 1979, 1979-83, and 1984 and later. Estimates are not directly compatible among periods.

6/ Excludes operator dwellings.

7/ Cash income less cash expenses and capital consumption.

8/ Gross farm income less rental value of operator dwellings.

9/ Gross receipts of farms less nonfactor payments, interest, contract and hired labor expenses, and net rent to nonoperator landlords.

10/ Includes off-farm income for members of farm operator's family.

Table 5--Cash receipts, by commodity groups and selected commodities, United States and States, 1984-88 1/

State and commodity	1984	1985	1986	1987	1988

All other crops	22,578	34,674	38,317	43,284	46,686
Sugar beets	20,928	33,024	36,600	41,248	44,684
Other seeds	200	200	270	330	200
Other field crops	250	250	210	310	320
Greenhouse/nursery	1,200	1,200	1,200	1,300	1,300

NA = not available. 1/ USDA estimates and publishes individual cash receipt values only for major commodities and major producing States. The U.S. receipts for individual commodities, computed as the sum of the reported States, may understate the value of sales for some commodities, with the balance included in the appropriate category labeled "other" or "miscellaneous." The degree of underestimation in some of the minor commodities can be substantial. 2/ All citrus sold before the traditional marketing year, which begins in October.

1/ Data are for farms with annual sales of $1,000 or more. 2/ All crops held on farms including value above loan rates for crops held under CCC. 3/ Includes CCC storage and drying facilities loans. 4/ Includes debt owed to institutional lenders and to noninstitutional or miscellaneous lenders. These crops are included as assets. 5/ Total debt in this ratio is an average for the year.

NA = not available. 1/ Numbers may not add because of rounding. 2/ Loans for aquaculture are excluded. 3/ Production credit associations (PCA) and Federal intermediate credit bank loans are now combined and shown in the column for PCA loans.

*U.S. GOVERNMENT PRINTING OFFICE:1989-717-013:04483/ERS

Get these timely reports from USDA's Economic Research Service

These periodicals bring you the latest information on food, farms, and rural America to help you keep your expertise up-to-date. Order these periodicals to get the latest facts, figures, trends, and issues from ERS.

Agricultural Outlook. Presents USDA's farm income and food price forecasts. Emphasizes the short-term outlook, but also presents long-term analyses of issues ranging from international trade to U.S. land use and availability. 11 issues annually. *1 year, $22; 2 years, $43; 3 years, $63.*

Farmline. Concise, fact-filled articles focus on economic conditions facing farmers, how the agricultural environment is changing, and the causes and consequences of those changes for farm and rural people. 11 issues annually. *1 year, $11; 2 years, $21; 3 years, $30.*

National Food Review. Offers the latest developments in food prices, product safety, nutrition programs, consumption patterns, and marketing. 4 issues annually. *1 year, $10; 2 years, $19; 3 years, $27.*

Economic Indicators of the Farm Sector. Updates economic trends in U.S. agriculture. Each issue explores a different aspect of income and expenses: national and State financial summaries, production and efficiency statistics, costs of production, and an annual overview. 6 issues annually. *1 year, $12; 2 years, $23; 3 years, $33.*

Rural Development Perspectives. Crisp, nontechnical articles on the results of new rural research and what those results mean. 3 issues annually. *1 year, $9; 2 years, $17; 3 years, $24.*

The Journal of Agricultural Economics Research. Technical research in agricultural economics, including econometric models and statistics focusing on methods employed and results of USDA economic research. 4 issues annually. *1 year, $7; 2 years, $13; 3 years, $18.*

Foreign Agricultural Trade of the United States. Updates the quantity and value of U.S. farm exports and imports, plus price trends. 6 issues annually, 2 annual supplements, and monthly updates. *1 year, $20; 2 years, $39; 3 years, $57.*

Situation and Outlook Reports. These reports provide timely analyses and forecasts of all major agricultural commodities and related topics such as finance, farm inputs, land values, and world and regional developments. Each *Situation and Outlook* title costs: *1 year, $10; 2 years, $19; 3 years, $27.* Titles include:

Agricultural Exports	*Cotton and Wool*	*Oil Crops*	*Vegetables and Specialties*
Agricultural Income and Finance	*Dairy*	*Rice*	*Wheat*
Agricultural Resources	*Feed*	*Sugar and Sweeteners*	*World Agriculture*
Aquaculture	*Fruit and Tree Nuts*	*Tobacco*	*World Agriculture Regionals*

Also available: *Livestock and Poultry:* 1 year, $15; 2 years, $29; 3 years, $42.
